## DIRIGIBLE STARTS OVER OCEAN LEAVES SCOTLAND IN FOG; 300 MILES AT NOON

(By Associated Press.)  
LONDON, July 2.—The British dirigible R-4, which left East Fortune, Scotland, early today for a transatlantic flight, was approximately 300 miles west of Penzance, England, at noon. Greenwich time, indicating that the ship had traveled in a westerly direction along the coast of Ireland. Major Scott, the commander, wireless that the dirigible was making 32 knots an hour in a thick fog. All was well. The mail carried includes a letter from King George to President Wilson.

(By Associated Press.)  
EAST FORTUNE, Eng., July 2.—Departure of the dirigible was with a series of blind farewells as the dirigible was the last to leave the airfield. The dirigible was the last to leave the airfield.

The dirigible started on the trip to America with little more ceremony than that which attended the departure of dirigibles for the most recent North Sea patrol during the war. The dirigible was quickly taken from the airfield, and it was turned straight westward. The dirigible was quickly taken from the airfield, and it was turned straight westward.

LONDON, July 2.—The British dirigible reached 53 degrees 50 minutes north latitude and 18 degrees west longitude at 3.30 this afternoon, Greenwich time.

The position of the dirigible at 2 o'clock Greenwich time was approximately 11 miles west of Clifden in the town of Connacht, Ireland.

### NEW YORK HAS RIPPING TIME

With the statement that the Tono-pan Divide had cut the ledge on the 560-foot level to guide them, operators on the New York curb had no doubt as to the result. The dirigible was quickly taken from the airfield, and it was turned straight westward.

The opening-back east was strong, every quotation showing an improvement. Although an effort was made to hold down Belcher which was bid 60 and 70 at 10 o'clock in Philadelphia with New York bidding 69 1/2. Dividend was 80 to 82. Verdi at 11. Silver King 24 to 26, while for Dividend Extension 33.37 1/2 was asked at the Quaker City.

Moran & Fenner have received instructions to begin surveying for patent on the Divide Extension and started setting their data today.

Bushy eyebrows may serve some purpose, but who knows what?

### SPANISH BELT IN GOOD ORE

Julius A. Herrod, the president and general manager of the Consolidated Spanish Belt Silver Mining company, who is spending a few weeks in an expedition at the property of the company at Spanish Belt, returned to Tonopah yesterday from the property. Mr. Herrod in conversation with a representative of the Bonanza said:

Since the last report on Spanish Belt the west drift from the main tunnel has been extended a distance of twelve feet on the Ernest vein. The vein now shows an average width of five feet and the zinc and iron sulphides are showing up very heavily. The vein is dipping at an angle of about 45 degrees and the values are going down. Samples taken from the vein at the 90-foot level run from \$15.58 to \$41.80 per ton. The average of the vein at this point is about \$26 a ton from wall to wall. The indications are that this ore body will extend to the west for over 250 feet.

In the east drift from the main tunnel all necessary retrimming has been done and a station cut at the foot point. Three shafts are now employed in this drift and the drift will be continued through to the Ernest slope.

In the 145-foot level of the San Pedro shaft the level has been extended a distance of fifteen feet since the last report, giving a total distance of 85 feet from the shaft. A 12-inch stringer of quartz has been cut in the face and is rapidly widening. Assays taken from this stringer go \$22.42 and \$23.98 per ton.

Work has been started in cleaning out the Buford air shaft from the surface to the old tunnel level. This shaft has now been opened for a depth of 67 feet. Work will also be started in a few days cleaning out the old winze and connections made with the air shaft which will give plenty of air for all operations.

"We are now employing about twenty men at the property and expect to add considerably to this force in the near future."
